

Dameware Mini Remote Control

Remote Control Software and Remote Desktop Access

“Dameware Mini Remote Control has been a big time and money saver for us—it’s very inexpensive. With the time you would travel to sites in a month or two, you can easily save the cost of the license.”

– Neal Schafer, IT Director, Manatee Diagnostic Center

Dameware® Mini Remote Control from SolarWinds® is a powerful remote control software and desktop sharing tool that allows IT pros to remotely access end-users' computers, laptops, and servers for remote administration and support. With out-of-the-box support for Windows®, Linux®, and Mac® OS X operating systems, you can connect and provide tech support to multiple remote computers simultaneously. Dameware is a trusted, award-winning brand used by over 60,000 organizations worldwide.

Powerful remote control and desktop sharing capabilities

Conduct simple remote IT support sessions from one centralized console. You can enhance the quality of support during remote sessions using built-in features such as chat, screenshot capture, file transfer, keyboard and mouse lock, print, etc.

Remotely connect to sleeping and powered-off systems

Dameware Mini Remote Control includes support for Intel® vPro® with AMT, Wake-on-LAN, and Kernel-based Virtual Machine (KVM) features. These capabilities allow you to remotely access and provide support to out-of-band computers.

Chat with end-users from Dameware console during remote sessions

Easy-to-use, in-session chat utility lets you interact with end-users during remote sessions. No need to switch screens and open 3rd-party chat messengers.

Single-click screenshot capture of remote computer during remote session

Quickly take screenshots of remote computers and save the images on your local desktop.

Perform file transfers during remote sessions

Built-in drag-and-drop file transfer functionality lets you send and receive files between your local desktop and end-users' remote computer. Avoid having to send file attachments back-and-forth through emails during remote sessions.

Interactive Smart Card login and remote Smart Card authentication

Dameware Mini Remote Control offers secure remote connectivity with the help of interactive Smart Card login and remote Smart Card authentication. Dameware is the first remote administration software to offer these Smart Card options.

Easily manage user access and permissions

Set permissions for accessing remote computers based on user roles in your organization. Dameware Mini Remote Control lets you define remote-access privileges for different users and manage them via Group Policies.

Centralized administration and account management

When installed in the centralized deployment mode, Dameware Mini Remote Control allows you to centrally manage Dameware users and permissions, control and activate all Dameware licenses from a single location, and share global host lists with all Dameware users (IT technicians).

Active Directory authentication and single sign-on

Integration with Active Directory® (AD) allows you to easily import and manage the AD credentials of technician users, and enable AD-authenticated single sign-on.

Simple licensing and quick deployment

Dameware Mini Remote Control is licensed by the number of IT admin or technician logins. There is no limit to the number of end-user computers supported. Available as a standalone, do-it-yourself deployment software—downloads and installs in minutes!

ABOUT SOLARWINDS®

SolarWinds provides powerful and affordable IT management software to customers worldwide, from Fortune 500® enterprises to small businesses, managed service providers (MSPs), government agencies, and educational institutions. We are committed to focusing exclusively on IT, MSP, and DevOps professionals, and strive to eliminate the complexity that our customers have been forced to accept from traditional enterprise software vendors. Regardless of where the IT asset or user sits, SolarWinds delivers products that are easy to find, buy, use, maintain, and scale while

providing the power to address key areas of the infrastructure from on-premises to the cloud. This focus and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as the worldwide leader in both network management software and MSP solutions, and is driving similar growth across the full spectrum of IT management software. Our solutions are rooted in our deep connection to our user base, which interacts in our THWACK® online community to solve problems, share technology and best practices, and directly participate in our product development process.
