

FIND UNDIAGNOSED NETWORK PROBLEMS WITH CISCO® POWERED HEALTH CHECK

With hundreds, or even thousands of routers, switches, and controllers in your network, how do you know which devices are obsolete, covered by support agreements, affected by a defect or security vulnerability, or ready to support the services your growing business demands?

You could spend days (or weeks) gathering model numbers, software versions, and service dates, and hire consultants to distill this data into reports, or you could get detailed expert advice from the leaders in networking equipment and management software.

SolarWinds® Network Configuration Manager Connector for Cisco® SmartAdvisor

SolarWinds and Cisco, two of the most trusted names in networking, are bringing you access to Cisco’s SmartAdvisor reports. Now you can enjoy the convenience and insight of these reports prepared specifically for your network. Using SmartAdvisor you can identify:

- Which devices are nearing end-of-sales, end-of-support, and end-of-life.
- Which devices have warranty defects or security vulnerabilities.
- Which devices are capable of supporting IPv6 or streaming media.

Generate Your Custom Report

To get started you will need your Orion NCM installation address and credentials.
